&

**P.Suresh**

Contact: 663 8091

**Programme Coordinator.**

Successful cases where the sugar level is reduced within a month are reported. Out of 70 cases treated, 42 people have come after one month with results for further treatment. The remaining 28 cases have not reported for treatment on the camp date.

The data have been presented (updated up to November) in graphical form (PDF format) for viewing to know the progress. 7 new cases have been included. Diabetic research analysis will be concluded by December end 2002.

**FBS**-Fasting Blood Sugar

**PPBS**-Post Prandial Blood Sugar
